

Patient

U1

Male, 18, have got fever for 2 days. What should I do?

U4

No.

U5

I feel sore when I got up this morning.

U6

Have a stuffy nose.

U8

A bit of headache.

U10

Anyway, weak and feel cold.

U12

Ok, thx.

Doctor

U2

Do you have any other symptoms?

U3

Have you taken any medicines?

U7

Perhaps you catch a flu.

U9

Do you cough or have a sore throat?

U11

I recommend you to take febrifuge first and then go to hospital to do the blood routine examination.
