```java
private synchronized void autoFocusAgainLater() {
    if (!stopped && outstandingTask == null) {
        AutoFocusTask newTask = new AutoFocusTask();
        try {
            newTask.executeOnExecutor(AsyncTask.THREAD_POOL_EXECUTOR);
            outstandingTask = newTask;
        } catch (RejectedExecutionException ree) {
            Log.w(TAG, "Could not request auto focus", ree);
        }
    }
}
```
